

‘Kentucky Health’ discusses how climate change affects insects and the diseases they carry to humans

FOR RELEASE: Oct. 1, 2023

Insects are being displaced by changing weather patterns, habitat encroachment and other human behavior.

On this episode of *Kentucky Health*, host Dr. Wayne Tuckson talks with Dr. Subba Reddy Palli, a professor and state entomologist at the University of Kentucky, about the consequences climate change and human activity have upon the insect world and the diseases they carry.
