

‘Understanding Alzheimer’s and Dementia: A KET Forum’ examines the latest science for screening and treating memory loss and cognitive decline

FOR RELEASE: Sep. 18, 2024

Just like the rest of our bodies, our brains change as we age. Most of us eventually notice some slowed thinking and occasional memory problems. However, serious memory loss, confusion and other major changes in the way our minds work could be a troubling sign that our brain cells are failing.

On *Understanding Alzheimer’s and Dementia: A KET Forum*, host Dr. Wayne Tuckson and a panel of medical experts examine this topic and discuss the latest science on treatments, screenings and resources.

Understanding Alzheimer’s and Dementia: A KET Forum

KET Monday, Sept. 30 • 8/7 pm

Watch on-demand at [KET.org](https://ket.org) and the PBS App

This forum is part of KET’s The Next Chapter initiative, which focuses on aging issues and offers a curated collection of programs and resources related to the challenges and rewards of navigating one’s golden years. For more info, visit [KET.org/NextChapter](https://ket.org/NextChapter).

Understanding Alzheimer’s and Dementia: A KET Forum and The Next Chapter initiative are funded in part by the KET Endowment for Kentucky Productions.

KET is Kentucky’s largest classroom, where learning comes to life for more than two million people each week via television, online and mobile. Learn more about Kentucky’s preeminent public media organization at [KET.org](https://ket.org), on X [@KET](https://twitter.com/KET) and at facebook.com/KET.
